

# “Neurogenic Essential Hypertension: Origins and Novel Treatment with Selective Catheter-Based Renal Sympathetic Denervation”

## Prof. Dr. Murray Esler

Associate Director | Cardiovascular Neurosciences Division  
Baker IDI Heart & Diabetes Institute, Melbourne Victoria

Professor Dr. Murray Esler is the world's leading expert on the role of the autonomic nervous system in cardiovascular disorders. He is particularly well known for his research on neurogenic hypertension, heart failure, obesity, aging, clinical assessment of CNS turnover of monoamines and the contributions of stress to disease processes. He has authored over 350 research articles and has received numerous awards and prizes for his pioneering work on the sympathetic nervous system in health and disease. He is also a gifted speaker.
